

California State Route 101 Coastal Bike Tour

This scenic biking tour is a beginner to slightly moderate, mostly flat tour lead by Hike Bike Kayak's expert naturalist and historian guides. The duration of the tour is approximately 2 hours. The most scenic section of Southern California's famed coastal route stretches from Carlsbad, a charming seaside town brimming with surf culture to Solana Beach with its picturesque beaches and lively art community. Along the way, bikers will cruise through historic beach villages, past famed surf breaks, and beside expansive open beaches.

Bikers will also experience three distinct ecological sanctuary lagoons rich with rare birds, fish, other wildlife and a diverse plant community that only exists in this area. These lagoons provide a unique look at the few remaining coastal wetlands in Southern California that stretch from the foothills of the Cuyamaca Mountains all the way to our sandstone ocean cliffs.

While the beauty of this route impresses on its own, bikers will have the pleasure of professional Hike Bike Kayak guides providing historical, environmental, and cultural insights into our local treasures while ensuring guest safety and quality equipment.
